REASONS FOR ALLOWANCE

Claims 49, 52, 54-60 and 62-68 are directed to an allowable apparatus. Pursuant to the procedures set forth in the MPEP, claim 61, directed to a different species, previously withdrawn from consideration as a result of a restriction requirement, 07/05/05, is hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration have been rejoined, **the restriction requirement as set forth in the Office action mailed on 07/05/05 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The following is an examiner's statement of reasons for allowance: The claims describe a shaving apparatus that has a first shaving unit with an inactive first outer cutter and a first undercutter and an additional shaving unit with a second inactive outer cutter and a first undercutter, which have a skin agitation member disposed between them. A drive source drives the undercutters and the skin agitation member, wherein the skin agitation member is driven at a frequency that is lower than the frequency at which the first undercutter is driven.

Showers (3,411,206) teaches a shaving apparatus that has a first shaving unit with a first outer cutter and a first undercutter, a skin agitation member, and a drive source that drives the

skin agitation member at a frequency that is lower than the frequency of the first undercutter.

Showers does not teach an additional shaving unit and does not teach that the first outer cutter is inactive.

Braun (3,768,348) teaches a shaving apparatus that has a first shaving unit with an inactive first outer cutter and a first undercutter. Braun teaches a skin agitation member adjacent to the first shaving that is driven at a frequency lower than the first undercutter, but does not teach the skin agitation member is disposed between a first shaving unit and an additional shaving unit.

It would not have been obvious to combine the references above with other prior art teachings in order to meet the claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 571-272-4509. The examiner can normally be reached on Monday through Friday between 8am and 5pm.

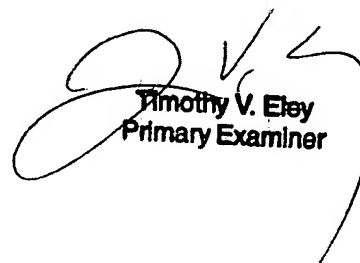

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer D. Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
